Monarch HandiPrint 6017 andheld printer

CUT THE CABLE. TURN MOBILE PRODUCTIVITY LOOSE.

Retail customers want to get in and out the door fast. The Monarch® HandiPrint 6017 printer is the ideal handheld printer for line busting. It turns a handheld computer into a mobile point-of-sale register with a Symbol® mobile PC cradled neatly inside. No cables are necessary. The sales assistant can immediately help customers waiting in long lines, completing any credit card purchases quickly and easily.

The process is fast. The sales assistant scans the item, swipes the credit card, and has the customer sign the screen. That's it. The Monarch® HandiPrint printer produces the receipt and your satisfied customer is out the door. No longer do you have to take an employee off the floor to open another cash register. The Monarch® HandiPrint printer *is* the other cash register.

The Monarch Handiprint printer is compatible with Symbol® SPT-1700 and PPT-2700 handheld computers/scanners. It prints a standard three-inch wide register receipt. It can also print lined or linerless label stock. Never again will a customers have to wait for a price check. Your Monarch HandiPrint printer can re-label items for a customer instantly.

The Monarch HandiPrint printer gives you the edge. The express checkout just got even quicker.

The Monarch HandiPrint printer mobilises productivity in ways not before possible. Delivery drivers can hand clients an on-the-spot receipt to accurately detail what was delivered. Door-to-door and 'party' business now have a quick and easy way to take credit cards and offer instant receipts, instead of writing them out by hand.

Since the printer and computer are entirely battery powered, business can even be conducted where there's no electrical outlet. Vehicle service centres can offer curbside check-in and wirelessly communicate to the mechanics in the garage. Pizza delivery companies will feel safer knowing their drivers can take credit cards instead of carrying cash around. Doctors can be assured there's no confusion when printing computer-generated prescription slips. The Monarch HandiPrint printer has started a revolution in mobile productivity.

The Monarch HandiPrint printer minimises downtime. Thermal printing eliminates the need for messy ink cartridges. The clamshell design enables lightning-fast supply changes. The Monarch HandiPrint printer runs on rechargeable Lithium Ion

batteries. Recharging saves money, since there are no costly batteries to constantly replace. Because the unit can be charged overnight, you can expect optimum performance all day long. The Monarch HandiPrint printer can print 2,500 inches of labels on a single charge so downtime is not a problem.

The Monarch HandiPrint printer is always accessible. With optional accessories it can be clipped to an employee's belt or mounted on your wall, dashboard or tabletop so it's always within reach.

“The checkout comes to your customer with the Monarch® HandiPrint printer.”

Belt, counter, desk or dashboard mounting clip for maximum **flexibility**

Lightweight for easy **portability**.

Rubber finger molds and security strap let the 6017 printer sit **comfortably** and securely in your hand.
