3-in-1 functionality means mark-down has never been easier

Mark-down promotions are an important part of helping your business reduce its waste figures. But when the task of marking down can involve two or more separate machines, a data terminal, scanning device and printer, it becomes a time consuming and costly exercise.

That's why the new Paxar Pathfinder® 6039™ is a time-saving and money-saving solution. Combining scanning, data collection and print and apply labelling all in one hand-held machine. It puts leading edge technology and multiple functionality at your fingertips, and will improve productivity.

It works where you do

With so many useful functions in just one machine, the Pathfinder® 6039™ is far too versatile to use only for mark-down or shelf edge labelling in store. Its rugged construction and durability means you can safely take it into any working environment.

Simplified logistics
Logistics and distribution operations can be simplified and streamlined, by eliminating the picking slip. Instead, by using the Pathfinder® 6039™ the host simply directs

the operator – via the RF network – to **pick, label, apply** and **pack** on the go.

Effortless inventory control
With the Pathfinder® 6039™ it's easy to identify the correct unloading bay or other location for incoming goods, and direct the delivery accordingly. By using the unit's real-time functionality means the stock system can be kept constantly up to date.

Key Features

Printer
Prints branded & security labels, tags and receipts

Robust
Durable rubber moulded casing for multiple one meter drops

Windows® CE
1/4 VGA high definition touch-screen & 17-key interface

REDUCED

Scanner
Lightweight robust built-in laser barcode scanner

Battery
The lightweight lithium Ion battery will last an eight hour shift. Hot-swapable, maintaining an active session during the battery change

Connectivity
802.11b/g RF network functionality Bluetooth® and USB OnTheGo connectivity with master/slave capability. Compact Flash & SD/MMC card slots

Print and Apply and more

Scanning

The Pathfinder® 6039™ incorporates one of the world's smallest high-intensity scanners for fast and accurate data capture.

Data collection

The optional 802.11b/g RF network functionality allows data collection and processing in real time. Built in USB OnTheGo with master or slave capability and optional Bluetooth® connectivity allows it to be connected to many peripheral devices such as chip'n'pin readers.

Labelling

Whatever kind of labels you need to print, the Pathfinder® 6039's™ built-in printer will print them. In addition to branded and security-type labels it will also print on tags and receipt paper.

Loading the print media is quick and easy, with a simple drop-in facility.

Windows® makes it easy

Based on the powerful Microsoft Windows® CE.Net platform, the Pathfinder® 6039™ has a familiar touch-screen interface, so operators need little training before they're ready to go.

The Windows®-based CE platform also eliminates the need for costly and time-consuming bespoke code writing. The widespread use of the CE platform means the Pathfinder® 6039™ can be integrated alongside most existing mobile devices, and support a huge number of back-end business systems.

Pathfinder® Ultra® 6039™ Platinum Specifications

Processor
Intel XScale PXA270C

Operating system
Microsoft Windows CE .NET 5

User interface
Colour touch-screen display – 1/4 VGA, 240x320

Passive stylus or finger operation

Backlight on/off control, adjustable contrast & brightness

Stylus clipped into base of unit attached with Lanyard

Keypad
17-key alphanumeric mobile phone style keypad

High durability rubberised keys

Printer
52mm (2") wide

8 dots/mm (203dpi) resolution

110mm (4") per second print speed

• Barcode symbologies
  EAN/UCC 8, 13, +2 +5, 128
  Interleaved 2 of 5, Extended Code 39
  Codabar (NW7), Code 39 / 128, MSI, Code 93

• 2 Dimensional barcodes
  Maxicode, PDF417, Postnet, Quick Response

• Fonts
  Standard, TrueType & International Fonts

Application software
Windows® CE .NET

Internet Explorer 6.0 for CE

Wireless network management software suite

Wavelink & Odyssey

Microsoft ActiveSync

Application software
Control scanner, printer, media loading & calibration

Programming environment
Visual Studio .NET - Windows® Sockets

Pathfinder SDK

Hardware APIs

Programming languages
VB.Net
C#.Net

Indicators
Internal speaker with volume control

LED indicating scanner performance

Barcode applications
Symbol lightweight laser scanner – SE923

Optional high-speed scanner – SE923HS

Expansion slots
One Compact Flash card slot

One SD/MMC memory card slot

High-speed USB OnTheGO port

Wireless communications
Expansion slots available:

802.11b (via Compact Flash)

Bluetooth® (via CF or SD/MMS slot)

External ports
USB OnTheGO host/slave port

Power management
High-capacity Lithium Ion battery (7.2V, 2200mAH)

Quick battery change door

Comprehensive battery gas gauge, independent printer gauge

Battery and optional AC power handle for fixed location operation

Built in rechargeable backup battery

Environmental (standard)
Operating temp:+4ºC to +45ºC

Storage temp:-40ºC to +80ºC

Humidity: 5% to 90% RH non-condensing

Shock: Drop test of 1.8m (6ft) onto solid concrete

Physical dimensions
Weight: 940g (2lbs) with battery

Height – 165mm

Width – 197mm

Depth – 83mm

Power accessories
AC power supply

Single slot battery charger

Four station battery charger

Backup battery storage charger

Carrying accessories
Handstrap – lanyard
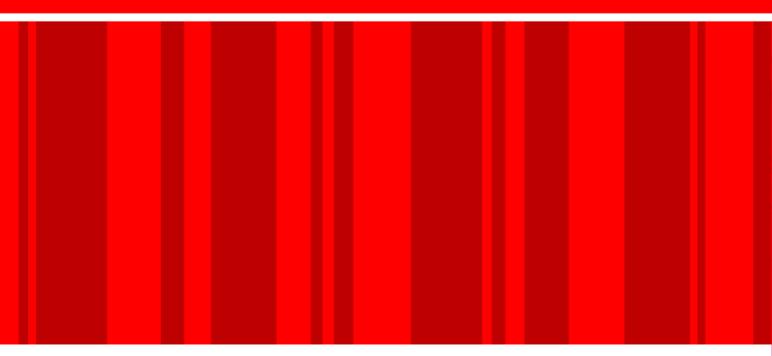

Luxury hand strap

Shoulder strap

Holster

Approvals
Safety: NRTL to UL60950, CSA C22.2
